# Guia Rápido: SQL Joins

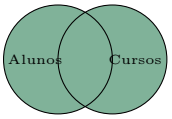

Me. Sergio Souza Novak

## INNER JOIN

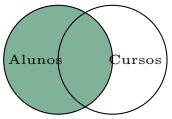

```sql
SELECT A.nome, C.nome_curso
FROM Alunos A
INNER JOIN Cursos C ON A.c_id = C.id;
```

## FULL OUTER JOIN

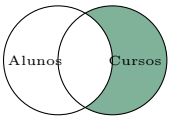

```sql
SELECT A.nome, C.nome_curso
FROM Alunos A
FULL JOIN Cursos C ON A.c_id = C.id;
```

## LEFT JOIN

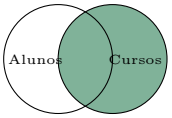

```sql
SELECT A.nome, C.nome_curso
FROM Alunos A
LEFT JOIN Cursos C ON A.c_id = C.id;
```

## RIGHT EXCLUSIVE

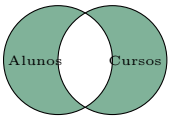

```sql
SELECT A.nome, C.nome_curso
FROM Alunos A
RIGHT JOIN Cursos C ON A.c_id = C.id
WHERE A.id IS NULL;
```

## RIGHT JOIN

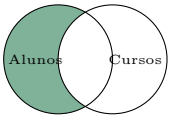

```sql
SELECT A.nome, C.nome_curso
FROM Alunos A
RIGHT JOIN Cursos C ON A.c_id = C.id;
```

## FULL EXCLUSIVE (Anti-Join)

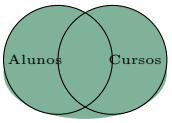

```sql
SELECT A.nome, C.nome_curso
FROM Alunos A
FULL JOIN Cursos C ON A.c_id = C.id
WHERE A.id IS NULL OR C.id IS NULL;
```

## LEFT EXCLUSIVE

```sql
SELECT A.nome, C.nome_curso
FROM Alunos A
LEFT JOIN Cursos C ON A.c_id = C.id
WHERE C.id IS NULL;
```

## CROSS JOIN (Produto Cartesiano)

```sql
SELECT A.nome, C.nome_curso
FROM Alunos A
CROSS JOIN Cursos C;
```
